

Magento 2 Extension

Captcha.eu

Installation Guide

Captcha.eu

1.8.2023

INTRODUCTION

This document is an installation guide for the Captcha.eu Captcha Extension for Magento 2 / Adobe Commerce.

Captcha GmbH, the Austrian Captcha solution Captcha.eu for companies of all sizes.

A solution that does not use cookies as well as tracking and therefore complies with ePrivacy as well as DSGVO guidelines to protect your customers.

Our product Captcha.eu is designed to assist website owners in protecting their forms, login screens, and other user-interaction points against bots. This product uses non-intrusive JavaScript SDKs, without requiring any user-interrupting puzzling process.

INSTALLATION

The following steps will guide you through the installation of the Captcha.eu Captcha Extension.

SYSTEM REQUIREMENTS

Captcha.eu Captcha requires Magento 2.X

INSTALL EXTENSION

Magento prefers installing extensions via Composer (<https://getcomposer.org>).

First you need to make sure your Access Keys are set up accordingly as Composer will use these credentials to connect and download the extension from the Marketplace.

Go to your SSH Console / Shell and install the extension from inside the magento folder:

```
composer require captcha-eu/magento
```

After installing, execute the following commands for the setup to upgrade:

```
php bin/magento setup:upgrade;  
php bin/magento setup:di:compile;  
php bin/magento setup:static-content:deploy -f;  
php bin/magento cache:clean;  
php bin/magento cache:flush;
```

ACCESSING THE CAPTCHA.EU EXTENSION

The installed Captcha.eu Captcha extension can now be accessed in the Magento 2 Admin Area / Backend.

Navigate to: STORES → Configuration → CAPTCHA.EU

SIGN UP AT CAPTCHA.EU

Go to www.captcha.eu/login and sign up, your first **100 validations** are **free**.

Once you've registered, you'll have access to our dashboard where you can manage your subscription, add your domains and get API keys.

When done, you'll get the **REST Key** and **Public Key** - head back to your Adobe Commerce or Magento 2 admin interface and follow the steps described in the following section.

CONFIGURATING THE CAPTCHA.EU EXTENSION

After navigating to the Captcha.eu Settings (STORES → Configuration -> CAPTCHA.EU), you will need to enter your REST Key & Public Key previously obtained from the Captcha.eu Website.

General Config

Captcha.eu REST-Key <small>[store view]</small>	001aad2be81ed84e3d587897a85c7218e0d16fd39cfee061bbb3b303aaeaa
Captcha.eu Public-Key <small>[store view]</small>	3209c35c0fa5425c5216095b3586480b81e85da2aa0b384db266097171167
Captcha.eu Host <small>[store view]</small>	https://www.captcha.eu

You can enable/disable the areas that you want to protect using Captcha.eu.

Frontend

Enable <small>[website]</small>	Yes	
Protect Login <small>[website]</small>	Yes	<input type="checkbox"/> Use system value
Protect Forgot Password <small>[website]</small>	Yes	<input type="checkbox"/> Use system value
Protect Contact <small>[website]</small>	Yes	<input type="checkbox"/> Use system value
Protect Create User <small>[website]</small>	Yes	<input type="checkbox"/> Use system value
Protect Newsletter <small>[website]</small>	Yes	<input type="checkbox"/> Use system value
Protect Send To Friend <small>[website]</small>	Yes	<input type="checkbox"/> Use system value

Depending on your cache settings, you may need to flush the magento cache using the commands stated earlier in this documentation.
